

# New Hampshire's Chaging Climate & Lakes

## Hosted by NH LAKES

Wednesday, December 2, 7:00 – 8:00 p.m.

Zoom Chat Box Discussion

- 00:59:40 Krystal Balanoff, NH LAKES: Wow Rockingham County is a stand alone!
- 01:02:28 MPett: Has the global travel reduction due to the pandemic made any meaningful contribution to alleviating CO2 trends?
- 01:02:56 Krystal Balanoff, NH LAKES: Awesome question! We will ask our expert at the end.
- 01:09:31 theresethompson: geoengineering and HAARP facilites  
<https://www.geoengineeringwatch.org/>
- 01:11:27 MPett: If electricity generation is the second most significant contributor to CO2/greenhouse gases are there any substantive climate benefits to the advent of electric vehicles?
- 01:12:09 EB: Has there been increased saltwater intrusion in wells/ground water on the coast?
- 01:12:38 Krystal Balanoff, NH LAKES: Hmmm I wonder. We will ask the experts!
- 01:15:36 Jessica Sayers, NH LAKES: no skiing = sad
- 01:28:13 theresethompson: fossil fuels are burned to make electricity
- 01:30:50 Krystal Balanoff, NH LAKES: Swimming through invasive species is literally my worst nightmare.
- 01:32:08 June Fichter:Great presentations, thank you!
- 01:35:17 MPett: Thank you for your responses, Sherry, and for your presentation overall.
- 01:38:14 Kenneth Houston: I'm wondering about geoengineering, and in particular proposals to put Sulphur aerosols into the upper atmosphere to increase the reflectivity of the atmosphere. While undesirable, will this be necessary, and what would be the unintended consequensces?
- 01:39:01 Ann Haralambie: Thank you
- 01:39:10 theresethompson: yes those are Chem Trails
- 01:39:20 joannmaynard: Thank you for a very informative presentation!
