Loon Monitoring & Recovery in New Hampshire

Webinar Presented by NH LAKES and the Loon Preservation Committee

Concord, N.H., July 24, 2020 – Join NH LAKES and the Loon Preservation Committee on Wednesday, July 29, at 7:00 p.m., for the webinar “Loon Monitoring & Recovery in New Hampshire.”

The Common Loon is an iconic symbol of New Hampshire’s pristine lakes and ponds and an important part of New Hampshire’s natural character. They are also recognized as sentinels of environmental health because they are sensitive to contaminants in lakes and ponds. The Loon Preservation Committee (LPC) was created in 1975 because of concerns about dramatic declines in New Hampshire’s loon population. Attend this session and find out how loons are doing in New Hampshire today and how you can help LPC in their loon monitoring and recovery efforts!

Presented by Caroline Hughes, Outreach/Volunteer Coordinator, Loon Preservation Committee, and Harry Vogel, Senior Scientist and Executive Director, Loon Preservation Committee.

This webinar is the final session of the Working for Clean & Healthy Lakes webinar series. Be sure to check it out!

The webinars are FREE, but pre-registration is required, and space is limited. Past webinars are available for viewing on the NH LAKES website. Visit nhlakes.org/healthy-lakes-webinar to learn more and sign up.

Established in 1992, the mission of NH LAKES, a statewide, member supported nonprofit organization, is to ensure that New Hampshire’s 1,000 lakes are clean and healthy, now and in the future. NH LAKES works with partners, promotes clean water policies and responsible use, and inspires the public to care for our lakes. For more information, visit nhlakes.org, email info@nhlakes.org, or call 603.226.0299
