The Ecology & Management of Plants in New Hampshire's Lakes
Free Webinar Offered by NH LAKES

Concord, N.H., August 24, 2020 – Join NH LAKES on Wednesday, August 26, at 7:00 p.m., for “The Ecology and Management of Plants in New Hampshire’s Lakes.” New Hampshire’s 1,000 lakes are home to a variety of plants—many that are beneficial for the ecosystem and some that are not. This webinar will feature guest speaker Amy Smagula, Exotic Species Program Coordinator with the New Hampshire Department of Environmental Services.

Tune in and find out how to recognize what’s growing and blooming in your favorite lake, and how to recognize a problematic plant. You’ll also learn what is being done to manage the growth of ‘weeds’ in our lakes. Be sure to bring your questions!

This webinar is offered as part of the “Ecology & Management of New Hampshire’s Lakes” webinar series. These webinars are FREE, but pre-registration is required, and space is limited. Visit nhlakes.org/ecology-and-management-webinars to learn more and sign up!

Established in 1992, the mission of NH LAKES, a statewide, member supported nonprofit organization, is to ensure that New Hampshire’s 1,000 lakes are clean and healthy, now and in the future. To achieve its mission, NH LAKES works with partners, promotes clean water policies and responsible use, and inspires the public to care for our lakes. For more information, visit nhlakes.org, email info@nhlakes.org, or call 603.226.0299
