Successes? Yes

Septic survey—75% response
 GLA buy-in
 Lake users

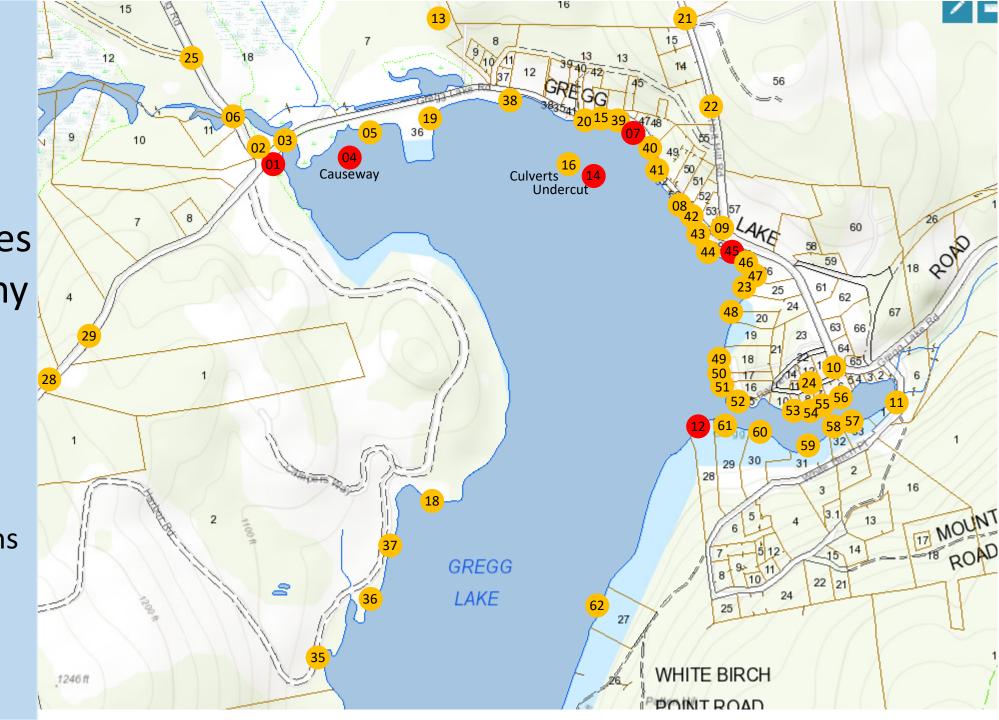

Challenges? Many!

Cearning the process
Planning Board
Selectboard
Delays, delays, delays
WMP finished March 2020

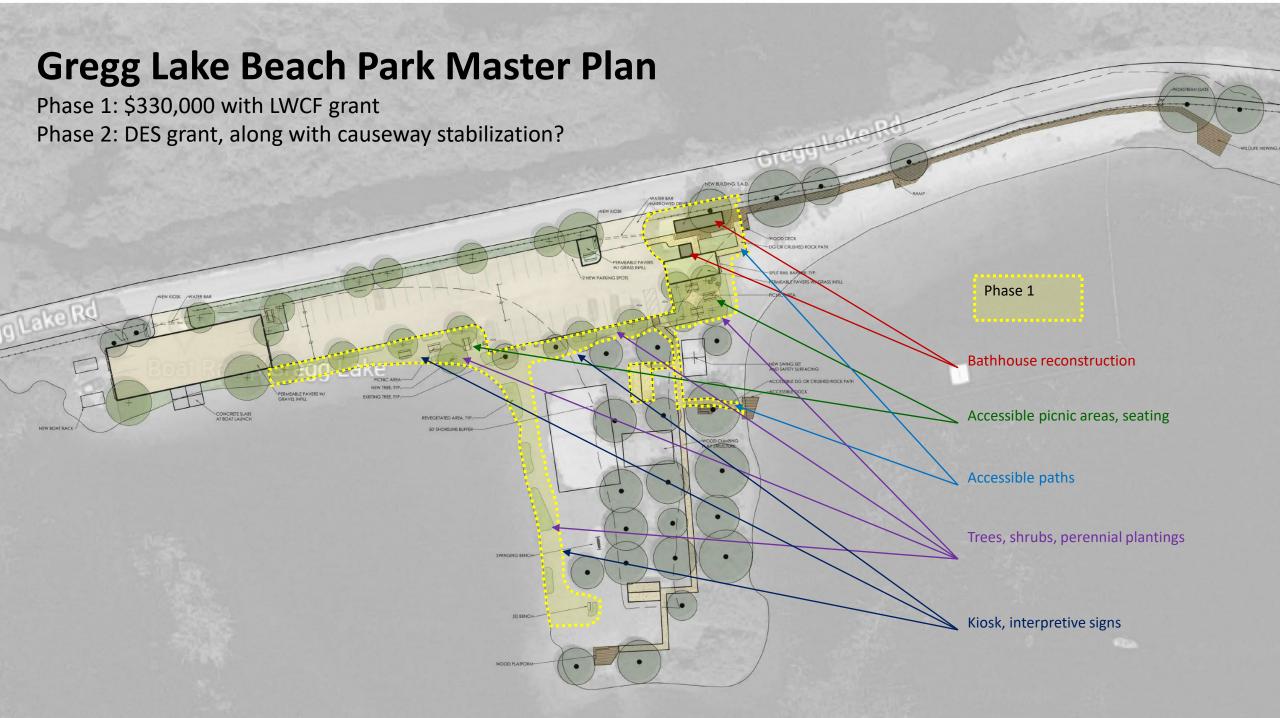

Gregg Lake: Many minor pollution sources

WQ goal requires progress at many levels:

- Town property
- Private property
- Ordinances
- Conservation
- Boating regulations

Have we achieved anything? Erosion Hotspots under Town Jurisdiction #1 BC Rd—retention basin built ✓ #2 GL Rd undercut #3 GL Rd Causeway shoulder #6 Public beach—LWCF grant

Erosion Hotspots on Private Properties

- #4 Private beach sand X3
- #5 WBP private beach—road vs beach erosion
- DES Soak Up the Rain
 - 10 homes visited 2021
 - Another 10 scheduled in 2022
- Septics—4 systems replaced
- 2 Conservation easements

Ordinances and Regulations Planning Board "clarifying" shoreland protection ordinances

Future Challenges?

- Lower horsepower limit
- Increase no-wake zone

Gregg Lake WMP

- We did it! (with help)
- We know our lake and watershed well
- Convincing others is progressing
